CONTENTS OF VOLUME 102

PAGE

R. HIDE—Motions in planetary atmospheres. Presidential Address 1

W. C. MACKLIN, J. N. CARRAS and P. J. RYE—The interpretation of the crystalline and air bubble structures of hailstones 25

S. C. MOSSOP—Production of secondary ice particles during the growth of graupel by riming 45

A. H. BUNTING, M. D. DENNETT, J. ELSTON and J. R. MILFORD—Rainfall trends in the West African Sahel 59

K. E. TRENBERTH—Fluctuations and trends in indices of the southern hemispheric circulation 65

M. J. P. CULLEN—On the use of artificial smoothing in Galerkin and finite difference solutions of the primitive equations 77

J. GLAZIER, J. L. MONTEITH and M. H. UNSWORTH—Effects of aerosol on the local heat budget of the lower atmosphere 95

B. J. HOSKINS—Baroclinic waves and frontogenesis. Part I: Introduction and Eady waves 103

R. A. FLATHER and A. M. DAVIES—Note on a preliminary scheme for storm surge prediction using numerical models 123

R. F. CHISNELL and J. LATHAM—Ice particle multiplication in cumulus clouds 133

T. G. J. DYER—On the components of time series; the removal of spatial dependence .. 157

G. AILAM and J. NEUMANN—Extremizing downwind concentration of pollutants from plane area sources 167

D. ANFOSSI, P. BACCI and A. LONGHETTO—Forecasting of vertical temperature profiles in the atmosphere during nocturnal radiation inversions from air temperature trend at screen height 173

K. G. MCNAUGHTON—Evaporation and advection I: evaporation from extensive homogeneous surfaces 181

K. G. MCNAUGHTON—Evaporation and advection II: evaporation downwind of a boundary separating regions having different surface resistances and available energies 193

D. J. GAUNTLETT, L. M. LESLIE and D. R. HINCKSMAN—A semi-implicit forecast model using the flux form of the primitive equations 203

B. J. MASON; C. B. MOORE—Theories of thunderstorm electrification 219

J. WIERINGA—An objective exposure correction method for average wind speeds measured at a sheltered location 241

Correspondence and Notes—

M. MERRY and H. A. PANOFSKY—Statistics of vertical motion over land and water .. 255

D. MORAVEK, H. A. PANOFSKY and A. WEBER—Determination of surface stress from vertical-velocity spectra 260

J. H. FENNER—Comments on the paper by R. S. Pastushkov "The effects of vertical wind shear on the evolution of convective clouds." Reply by R. S. Pastushkov 263

Discussions—

G. L. AUSTIN and A. BELLON—The use of digital weather radar records for short-term precipitation forecasting 265

R. A. S. RATCLIFFE—The use of 500mb anomalies in long-range forecasting 265

Proceedings at meetings of the Society 267

Review—

Physical and dynamical climatology. Proceedings of the Symposium on Physical and Dynamical Climatology, Leningrad, August 1971 (R. P. Pearce) 270

Obituary Notices 271

Corrigenda 275

M. C. TAPP and P. W. WHITE—A non-hydrostatic mesoscale model 277

C. TEMPERTON—Dynamic initialization for barotropic and multi-level models .. 297

W. T. ROACH, R. BROWN, S. J. CAUGHEY, J. A. GARLAND and C. J. READINGS—The physics of radiation fog: I—a field study 313

TABLE OF CONTENTS

	PAGE
R. Brown and W. T. Roach—The physics of radiation fog: II—a numerical study	335
W. T. Roach—On some quasi-periodic oscillations observed during a field investigation of radiation fog	355
W. T. Roach—On the effect of radiative exchange on the growth by condensation of a cloud or fog droplet	361
M. W. Moncrieff and M. J. Miller—The dynamics and simulation of tropical cumulonimbus and squall lines	373
A. K. Betts, R. W. Grover and M. W. Moncrieff—Structure and motion of tropical squall-lines over Venezuela	395
H. C. Davies—A lateral boundary formulation for multi-level prediction models	405
R. F. Griffiths and C. T. Phelps—The effects of air pressure and water vapour content on the propagation of positive corona streamers, and their implications to lightning initiation	419
G. E. Willis and J. W. Deardorff—A laboratory model of diffusion into the convective planetary boundary layer	427
Correspondence and Notes	
J. T. Schaefer—Moisture features of the convective boundary layer in Oklahoma	447
J. S. A. Green; H. Riehl—Comments on the paper by A. Robock 'On the eddy structure of huricanes.' Reply by A. Robock	451
C. D. Rodgers—Comments on Paltridge's 'Minimum entropy exchange principle.' Reply by G. W. Paltridge	455
J. H. Fenner—The motion of thunderstorm cells in relation to the mean wind and mean wind shear	459
R. N. Kulkarni—Nitrogen dioxide and ozone measurements over Australia	461
W. C. Bain—The power spectrum of temperatures in central England	464
E. A. Ripley—Comment on the paper by J. G. Charney 'Dynamics of deserts and drought in the Sahel.' Reply by J. Charney	466
Proceedings at meetings of the Society	469
Reviews—	
Proceedings of Symposium: Chemical kinetics data for the upper and lower atmosphere, ed. by S. W. Benson, D. M. Golden and J. R. Barker (R. P. Wayne); *The general circulation of the tropical atmosphere and interactions with extratropical latitudes.* Volume 2 by R. E. Newell, J. W. Kidson, D. G. Vincent and G. J. Boer (J. R. Bates)	471
B. J. Mason—Towards the understanding and prediction of climatic variations... Symons Memorial Lecture	473
K. A. Browning and G. B. Foote—Airflow and hail growth in supercell storms and some implications for hail suppression	499
B. B. Hicks—Wind profile relationships from the 'Wangara' experiment	535
C. M. R. Platt—Infrared absorption and liquid water content in stratocumulus clouds	553
J. W. Deardorff—On the entrainment rate of a stratocumulus-topped mixed layer	563
P. R. Rowntree—Tropical forcing of atmospheric motions in a numerical model	583
P. R. Rowntree—Response of the atmosphere to a tropical Atlantic ocean temperature anomaly	607
Barbara M. Gray—Medium term fluctuations of rainfall in southeastern England	627
K. E. Trenberth—Spatial and temporal variations of the Southern Oscillation	639
H. W. Ellsaesser, M. C. MacCracken, G. L. Potter and F. M. Luther—An additional model test of positive feedback from high desert albedo	655
R. E. Basher—The approximation of particulate scattering coefficients in the determination of total ozone	667
P. B. Russell, W. Viezee, R. D. Hake, Jr. and R. T. H. Collis—Lidar observations of the stratospheric aerosol: California, October 1972 to March 1974	675
Notes and Correspondence—	
R. N. Kulkarni—Ozone trend and the stratospheric circulation over Australia	697
Z. Warhaft—Heat and moisture flux in the stratified boundary layer	703
J. F. Austin—Waves in the southern hemisphere	707
K. M. Carpenter—Vertical advection at the lower boundary in a non-hydrostatic mesoscale model	709

T. TAKASHIMA and C. R. NAGARAJA RAO—Comments on the paper by C. R. Nagaraja Rao, T. Takashima and R. B. Toolin 'Measurements and interpretation of the polarization of radiation emerging from the atmosphere at an altitude of 28 km over southwestern New Mexico (USA)' 711

R. F. CHISNELL and J. LATHAM: S. C. MOSSOP—Comments on the paper by Mason 'Production of ice crystals by riming in slightly supercooled cumulus'. Reply by B. J. MASON, with comments on paper by Chisnell and Latham 'Ice particle multiplication in cumulus clouds'. Reply by R. F. CHISNELL and J. LATHAM .. 713

Discussion—

B. J. LEGG and I. F. LONG—Turbulent diffusion within a wheat canopy I. Measurement using nitrous oxide, and II. Results and interpretation (*Q.J.*, **101**, pp. 597–628) .. 720

Report of the Council for 1975 721

Proceedings at meetings of the Society 737

Reviews—

Annual Report of the Meteorological Office 1974. London (H.M.S.O.) (F. H. Ludlam); *Meteorology and climatology*, Volume 1, I. P. Danilina and A. P. Kapitsa (D. H. McIntosh); *The dynamic meteorology of the stratosphere and mesosphere: Meteorological Monograph*, Volume 15, (Adrian Simmons); *Climate in a small area—an introduction to local meteorology*, Masatoshi M. Yoshino (Alasdair S. Thom) .. 740

Corrigenda 742

M. K. MILES—The relation of the poleward flux of sensible heat during the winter half year to some zonal and meridional indices of the circulation 743

A. F. TUCK—Production of nitrogen oxides by lightning discharges 749

I. HIROTA—Seasonal variation of planetary waves in the stratosphere observed by the Nimbus 5 SCR.. 757

JAMES L. COGAN.—Interpretation of 8–13μm measurements of sea-surface temperature 771

A. WEISS and L. H. ALLEN, Jr.—The flux-angle distribution of momentum as determined from propeller anemometer measurements 775

D. J. MCCLEESE and L. S. WILSON—Cloud top heights from temperature sounding instruments 781

R. K. SMITH and L. M. LESLIE—Thermally driven vortices: a numerical study with application to dust-devil dynamics 791

DANIEL CADET and HENRI OVARLEZ—Low-level air flow circulation over the Arabian Sea during the summer monsoon as deduced from satellite-tracked superpressure balloons. Part I—Balloon trajectories 805

G. E. WILLIS and J. W. DEARDORFF—On the use of Taylor's translation hypothesis for diffusion in the mixed layer 817

J. M. CRADDOCK—Annual rainfall in England since 1725 823

H. L. PENMAN and I. F. LONG—Profiles and evaporation 841

ERNEST W. PETERSON, LEIF KRISTENSEN and CHANG-CHUN SU—Some observations and analysis of wind over non-uniform terrain 857

T. G. J. DYER—An analysis of Manley's central England temperature data: I .. 871

C. J. MOORE—A comparative study of radiation balance above forest and grassland .. 889

A. HOLLINGSWORTH, A. J. SIMMONS and B. J. HOSKINS—The effect of spherical geometry on momentum transports in simple baroclinic flows 901

Notes and Correspondence—

C. J. MOORE—Eddy flux measurements above a pine forest 913

P. C. BEADLE and S. R. MATTINGLY—Stratospheric heating due to absorption of solar radiation by NO_2 918

N. A. JACKSON—The propagation of modified flow downstream of a change in roughness 924

B. J. MASON—Further comments on Moore's criticisms of precipitation theories of thunderstorm electrification. With Reply. 933

Proceedings at meetings of the Society 940

Reviews—

A short course in cloud physics, R. R. Rogers (P. R. Jonas); *Noctilucent clouds*, V. A. Bronshten and N. U. Grishin (F. H. Ludlam) 943

Obituary Notices 945

Index and Contents pages 949
